

LAYOUT

[B] Session Break

Title - Design C- Martini Glass.
 Author - Bharath Anu Gundhimani
 Date - 13/05/2028
 Sheet No - Sheet #4
 Description - Interactive narrative visualization communicating findings about educational infrastructure investment socioeconomic equity & household travel behaviour in Victoria to policy makers & transport planners.

COMPONENTS / OPERATIONS

[E] Click "Jump to Explore" OR natural scroll past [B] section break → filters [F1] - [F4] active from greyed state; [G] renders first chart using default filter state (Mode share, All, All, ISRD 2-10); placeholder text in [G] disappears.
 [F1] Change Metric → [G] chart type changes type changes: Mode share → connected dot plot; Trip Duration → violin box plot; Vehicle Ownership → connected dot with 95% CI error bars; chart title in [G] updates.
 [F2] Change Trip Purpose → [G] re-renders for selected purpose, compounds with [F1] [F3] [F4].
 [F3] Change Investment Tier → [G] re-renders for selected tier, chart title updates; compounds with other filters.
 [F4] Drag ISRD Range slider → [G] removes or greys data points outside selected range; compounds with other filters.
 Hover over any data point in [G] → tooltip; value, group label, ranking etc).
 [C] Data source link to open.

FOCUS / PART 1 - Two State Transition

State A - Guided Scroll

[P1] - [P4] - Static visualization with author intended navigation.
 [A] Scroll bar to scroll as per reader choice/intention.
 [E] - Button to go to Exploration mode.

Click [E] → arrow

Back to narrative always available.

State B - Open Exploration

[F1] - [F4] - Filters to change the generated graph [G].
 Filters are active.
 • Filters have repeat drop boxes.

DISCUSSION

PRO

- Policymakers receive a structured evidence briefing before controls are handed over.
- Small based accumulation is cognitively natural.
- [E] gives immediate access to experienced policymakers to explore the visualization without making them sit through full narrative.
- [B] makes it clear to reader that they have finished reading & are entering a different mode.
- ← Back to narrative link enables user to come back to the normal mode.

CONS

- For experienced policymakers, the static narrative guided mode may be useless.
- Placing the Exploration zone on the right side may make the user think there is a exploration mode before even reaching the guided version.
- 4 long stacked narrative panels make the left column long - reader on small screen face significant scrolling before reaching the exploration.
