

Databases 2025 S1 Assignment 1 Feedback

Student Name: Bharath Gandhimani (bgan0012)

Marker: Bruce Chen

	Outstanding	Adequate	Not Adequate	Comments	Marks
TASK 1: Prepare a Conceptual Model based on page 2 of the brief ONLY [15 marks]					
Identification of the entities that support the case study (5 marks)	X			Please see annotated Conceptual PDF	4
Identification and placement of attributes to support the case study (5 marks)	X			Please see annotated Conceptual PDF	5
Determination of relationships that support the case study (5 marks)	X			Please see annotated Conceptual PDF	4.5
Only KEY labels are used on entities [Penalty applied (-2 mks) if P/F or PK/FK used]	X			Please see annotated Conceptual PDF	0
TASK 2: Normalise the supplied case study documents and integrate the resultant relations into a logical model [15 marks]					
Normalisation processes are correct (UNF,1NF,2NF, 3NF) (12 marks)	X			Please see annotated Normalisation PDF	11
Dependency diagrams have been provided and match normalisation. (3 marks)		X		Please see annotated Normalisation PDF	2
No additional attributes or surrogate key added in the normalisation process prior to attribute synthesis. [Penalty applied (maximum -3 mks) if added]	X			Please see annotated Normalisation PDF	0
Normalisation result is correctly integrated into logical model [Penalty applied (maximum -3 mks) if incorrect integration]	X			Please see annotated Normalisation PDF	0
TASK 3: LOGICAL MODEL [55 marks]					
Depict the data requirements expressed in the case study via a relational database logical model [45 marks]					
Oracle Data Modeler Model can be opened [Penalty applied if Model cannot be opened or non matching PDF submitted - maximum -10 marks]			X	Well done, however, your logical model does not match dnd file	-5
Identified required relations and attributes (10 marks)	X			Please see annotated Logical Model PDF	8.5
Primary keys are correctly identified (10 marks)	X			Please see annotated Logical Model PDF	8
Identified required relationships and cardinalities (10 marks)	X			Please see annotated Logical Model PDF	8.5
Added at least one appropriate surrogate key and required unique identifier (4 marks)		X		Please see annotated Logical Model PDF	2
Identified data types and null constraints requirements (5 marks)			X	CEO name could be null, date&time should be combined, and it could be null, pass_phone_no could be null and cabin_class length should be 1	0
Identified data integrity requirements - Business rules (6 marks)		X		Well done, however, pass_gender missed one value, PORT.port_lat/PORT.port_long must be declared Unique,	3
Generate a schema which meets the case study data requirements from the logical model produced [10 marks] This section will be awarded 0 marks if no relational model is present in your submission		X		Well done, however, your ddl code has issues	7
GENERAL [15 marks]					
Able to correctly use the required notation convention and be consistent in its usage [5 marks]		X		your information was missing in some file	3

Able to correctly push model to FIT GitLab server with a development history of at least nine pushes. - correct number of pushes, evenly distributed - no Git author errors - meaningful commit messages [10 marks]	X			Correct Git Commits	10
Submitted on time [Late Penalty - 5 marks per 24 hrs or part thereof]	X			On Time	0
					71.5
Final Grade:					71.5
